Norwegian Cruise Line Reports Results for First Quarter 2013

Company Reports Adjusted Net Income of \$12.9 Million and Adjusted EPS of \$0.06 With 7% Year-Over-Year Adjusted EBITDA Growth

MIAMI, May 6, 2013 (GLOBE NEWSWIRE) – Norwegian Cruise Line (Norwegian Cruise Line Holdings Ltd., NCL Corporation Ltd., "Norwegian" or "the Company") (Nasdaq:NCLH), today reported results for the quarter ended March 31, 2013, and provided guidance for 2013.

Quarter Highlights

- Successful Initial Public Offering ("IPO") and Notes Offering completed in the quarter
- Adjusted Net Income improved to \$12.9 million with Adjusted EPS of \$0.06 from \$3.3 million and \$0.02 in 2012
- Net Yield increased 3.3% on both an as reported and Constant Currency basis
- Adjusted Net Cruise Cost per Capacity Day excluding Fuel ("Adjusted NCC ex Fuel") decreased 1.5% on both an as reported and Constant Currency basis

Transactions in the Quarter

On January 24, 2013, the Company closed on its successful IPO at a price of \$19.00 per share. In addition, on February 6, 2013, the Company issued \$300 million of 5.00% senior unsecured notes. The aggregate net proceeds of the IPO and the Notes Offering were used to prepay certain credit facilities, prepay amounts due pursuant to the Norwegian Sky Purchase Agreement, redeem the full amount of the outstanding \$450 million 11.75% senior unsecured notes due 2016, redeem a portion of the outstanding \$350 million 9.5% senior unsecured notes due 2018 and for general corporate purposes.

First Quarter 2013 Results

"We are excited to announce another quarter of strong results, especially in light of this being our first quarter as a publicly traded company," said Kevin Sheehan, Norwegian Cruise Line's President and CEO. "These strong results bring us to nineteen consecutive quarters of year over year Adjusted EBITDA growth."

For the first quarter of 2013, the Company reported Adjusted Net Income of \$12.9 million and Adjusted EPS of \$0.06, which exclude \$110.4 million in expenses related to debt prepayments funded by the aggregate net proceeds from the IPO and the Notes Offering as well as non-cash compensation and other expenses related to the Company's IPO. On a GAAP basis, net loss and diluted EPS were \$(96.4) million and \$(0.49), respectively.

An increase in Net Yield, partially offset by lower Capacity Days primarily due to the planned Dry-dock of Pride of America, resulted in a 1.3% improvement in Net Revenue for the quarter to \$390.7 million. Net Yield increased 3.3%, on both an as reported and Constant Currency basis, on stronger overall pricing and increased onboard spend, particularly in the bar and shore excursion areas.

Adjusted Net Cruise Cost ex Fuel decreased 1.5%, on both an as reported and Constant Currency basis, mainly due to the timing of certain expenses. The first quarter included a portion of the Pride of America Dry-dock which extended into the second quarter. Incremental Dry-docks in subsequent quarters include Norwegian Pearl and Norwegian Sky. Fuel price in the quarter increased 12.5% to \$673 per metric ton from \$598 in 2012.

Interest expense, net for the period was \$127.7 million and included \$90.5 million in charges related to the prepayment of certain credit facilities and the redemption of certain of the Company's senior notes in connection with proceeds from both the Company's IPO and Notes Offering.

"Our initiatives for driving demand, pricing discipline and continuous improvement resulted in strong earnings and record guest satisfaction scores," said Sheehan. "These efforts contributed to our successful initial public offering and notes offering which further optimized our capital structure, strengthened our balance sheet and positioned Norwegian for future growth."

Non-GAAP Financial Measures

We use certain non-GAAP financial measures, such as Net Revenue, Net Yield, Net Cruise Cost, Net Cruise Cost Excluding Fuel, Adjusted Net Cruise Cost Excluding Fuel, Adjusted EBITDA and Adjusted Net Income to enable us to analyze our performance. We utilize Net Revenue and Net Yield to manage our business on a day-to-day basis and believe that they are the most relevant measures of our revenue performance because they reflect the revenue earned by us net of significant variable costs and are commonly used in the cruise industry to measure revenue performance. In measuring our ability to control costs in a manner that positively impacts net income, we believe changes in Net Cruise Cost and Net Cruise Cost Excluding Fuel to be the most relevant indicators of our performance and are commonly used in the cruise industry as a measurement of costs.

As our business includes the sourcing of passengers and deployment of vessels outside of North America, a portion of our revenue and expenses are denominated in foreign currencies, particularly euro and British pound sterling, which are subject to fluctuations in currency exchange rates versus our reporting currency, the U.S. dollar. In order to monitor results excluding these fluctuations, we calculate certain non-GAAP measures on a Constant Currency basis whereby current period revenue and expenses denominated in foreign currencies are converted to U.S. dollars using currency exchange rates of the comparable period. We believe that presenting these non-GAAP measures on both a reported and Constant Currency basis is useful in providing a more comprehensive view of trends in our business.

We believe that Adjusted EBITDA is appropriate as a supplemental financial measure as it is used by management to assess operating performance, is a factor in the evaluation of the performance of management and is the primary metric used in determining the Company's

performance incentive bonus paid to its employees. We believe that Adjusted EBITDA is a useful measure in determining the Company's performance as it reflects certain operating drivers of the Company's business, such as sales growth, operating costs, marketing, general and administrative expenses and other operating income and expense. You are encouraged to evaluate each adjustment and the reasons we consider them appropriate for supplemental analysis. In evaluating Adjusted EBITDA, you should be aware that in the future we may incur expenses similar to the adjustments in this presentation. Our use of Adjusted EBITDA has limitations as an analytical tool, and you should not consider this measure in isolation or as a substitute for analysis of our results as reported under GAAP. Our presentation of Adjusted EBITDA should not be construed as an inference that our future results will be unaffected non-recurring, infrequent or unusual items.

Adjusted EBITDA is not a defined term under GAAP. Adjusted EBITDA is not intended to be a measure of liquidity or cash flows from operations or measures comparable to net income as it does not take into account certain requirements such as capital expenditures and related depreciation, principal and interest payments and tax payments and it includes other supplemental adjustments.

In addition, we utilize Adjusted Net Income as a supplemental financial measure to demonstrate GAAP net income excluding non-recurring, infrequent or unusual items. These items vary from period to period; thus, our presentation of Adjusted Net Income may not be indicative of future adjustments or results.

Our non-GAAP financial measures may not be comparable to other companies. Please see a historical reconciliation of these measures to items in our consolidated financial statements.
